Set Up POP - Android™
If you would like to learn more about the differences between POP and IMAP, please see the help topic, "POP vs. IMAP" here: http://www.rackspace.com/apps/support/portal/4266/941/943/4012

To set up Android for POP, do the following:

1. From the **Home** screen, tap the **Application** button.

2. Tap the **Email** icon.

3. If this is your first email account, you will be presented with an email setup screen. Tap the **Next** button. Otherwise, press the **Menu** button, tap **Accounts**, press the **Menu** button, and tap **Add account**.

4. Enter your entire email address (e.g., myname@mydomain.com).

5. In the second box, enter the password associated with your email account.

6. Tap the **Manual setup** button.

7. Tap the **POP3** button.

8. Enter the following information in the fields provided:

- Username—Enter your entire email address (e.g., myname@mydomain.com).

- Password—Enter the password associated with your email account.

- POP server—Enter the secure server name: **secure.emailsrvr.com**

- Port—Enter the secure port number: **995**

- Security type—Select **SSL**
  Note: Be sure the Port number is still **995**

9. Tap the **Next** button. The device will connect to the internet and check your incoming settings.
10. On the **Outgoing server settings** screen, enter the following information in the fields provided:

- SMTP server—Enter the secure server name: **secure.emailsrvr.com**

- Port—Enter the secure port number: **465**

- Security type—Select **SSL**
  Note: Be sure the Port number is still **465**.

11. Tap the **Require sign-in** checkbox.

12. Tap the **Next** button. The device will connect to the internet and check your outgoing settings.

13. On the **Account options** screen, make changes, as desired.

14. Tap the **Next** button. On the **Set up email** screen, enter your name in the **Your name** field. This is the name that will be displayed in the From field of email messages you send.

15. Tap the **Done** button.
